Education

VIT Bhopal University, B.Tech in Computer Science specialization in Gaming Technology Sep 2020 – May 2024

Experience

Analyst, Tata Consultancy Services, Bhubaneswar Jul 2024 – Present

- Crafted backend-driven pages and business functionalities within the IFS Cloud platform using enterprise business logic and PL/SQL customization, improving workflow efficiency by 25% and enhancing user operational experience.
- Designed custom IFS Cloud business reports and backend SQL/PLSQL reporting logic for enterprise operational analytics, improving report generation efficiency by 30% and enabling faster data-driven decision-making.
- Optimized complex SQL and PL/SQL procedures for large-scale enterprise data migration, validation, and reporting workflows, reducing query execution time by 30% and improving overall data processing efficiency.
- Supported cloud-oriented enterprise data workflows within enterprise application, enhancing backend system scalability and improving operational data accessibility by 25%.

Software Engineer Intern, Microsoft, Bangalore May 2023 – Jun 2023

- Authored a comprehensive suite of unit tests for the backend C# and .NET Core services, increasing the coverage of the code to over 90% and preventing critical regressions.
- Developed and implemented new error handling modules, which reduced critical system errors by 30%.
- Refactored critical sections of the C# codebase to align with modern software design patterns, delivering production-ready code that reduces post-deployment bugs by 30%.
- Analyzed critical service dependencies across distributed systems and microservices architecture, driving 20% architectural improvements and over 50% gain in overall system reliability and scalability.

Projects

IFS Cloud Integration Developer

- Delivered IFS Cloud integrations and executed large-scale data migrations for master and transactional data, achieving 99% data consistency post-migration and reducing reconciliation efforts by 30%.
- Engineered backend workflow solutions using PL/SQL logic and enterprise system configurations, streamlining business processes and reducing manual operational effort by 25%.

Attendance Management System github.com/AMS

- Architected an end-to-end facial recognition module using Python and Django to automate employee attendance, achieving 98% accuracy and eliminating manual tracking errors.
- Streamlined a high-performance reporting dashboard in Django, implementing backend caching strategies and query optimization time by 50%. The system delivered real-time analytics with 40% greater data accuracy.

Technologies

Languages & Databases: C++, Java, C#, MySQL, PL/SQL, Python, MongoDB, Oracle SQL Server

Cloud & Technologies: .NET Core, IFS Cloud, Azure, AWS(Basics), ETL Pipelines, Databricks, SQL Optimization, Data Migration, CI/CD Fundamentals, REST APIs, Git, Django, Linux

Certifications

Microsoft Certified: Azure Developer Associate

IFS Certified Practitioner - Development
